EXTINCTIONERS

..So you must
admit that my offer
is quite generous.

Granted, you'll be
nothing more than
figure-heads in my
Mistresses
New Alden Order.

But, at least you'll still
have your lives and some
delusions of grandeur.

We will not negotiate
with terrorist!

Zora, head of the E.C.S Organization is currently in dire negotiations with Alden's major world leaders. Never let it be said that she is anything less than a master negotiator. At best, her tactics can be considered questionable if not quite effective.

Insane!

Preposterous!

Who do you think you are?!?

Female! You have some nerve!

You'd dare threaten Ursidania! We will crush any threat that'd come against us!

As queen of the United Kingdoms of Species we would never submit to such demands.

The Orient has faced such as you before and in comparison, you are less than nothing!

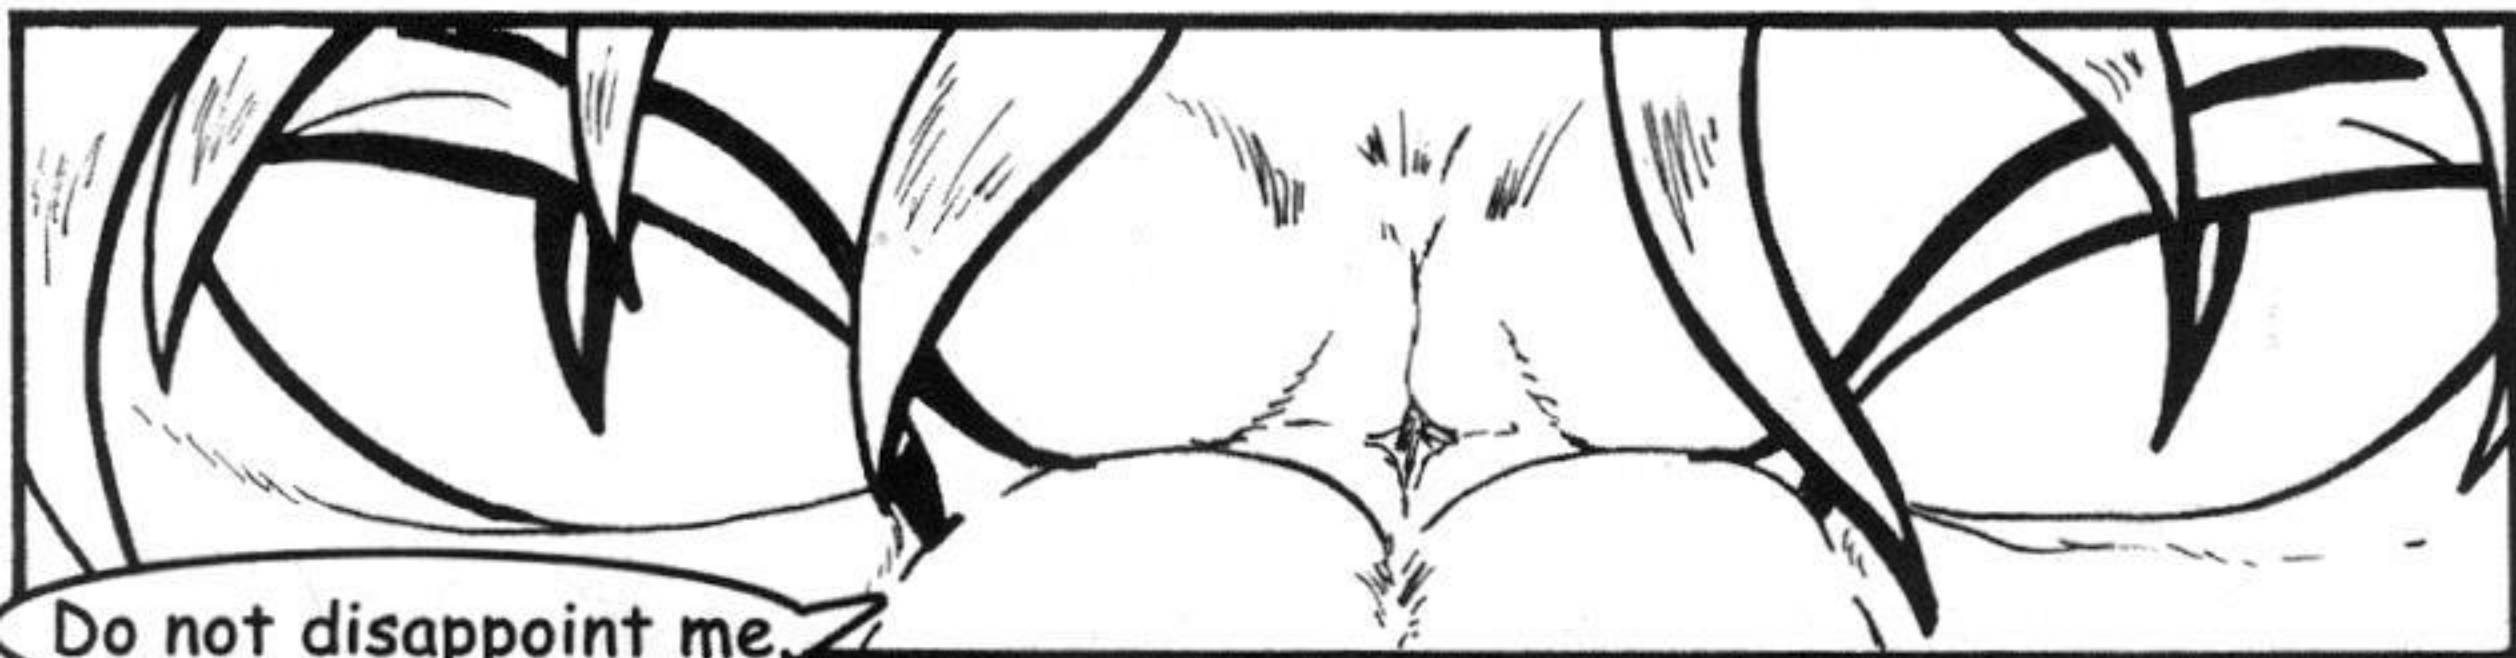

Bah. Why should we fear the words of a mere female?

WELL! I'LL GIVE YOU ONE GOOD REASON YOU SHOULD!

I HAVE AT MY DISPOSAL AN ARMY THAT COULD TURN YOUR FINEST CITIES TO DUST IN THE SPAN OF A MERE HOUR!

TRY MY PATIENCE AND YOU'LL LEARN I'M THE WRONG LIONESSE TO MOUNT WITH! YOU HAVE 24 HOURS!

Do not disappoint me.

Simply fabulous, Zora.

Thank you
Tonya my
dear.

And that, my
Sisters, is how
you hold a power
conference.

A bit over the top
and just why are my
cat soldiers in maid
uniforms?

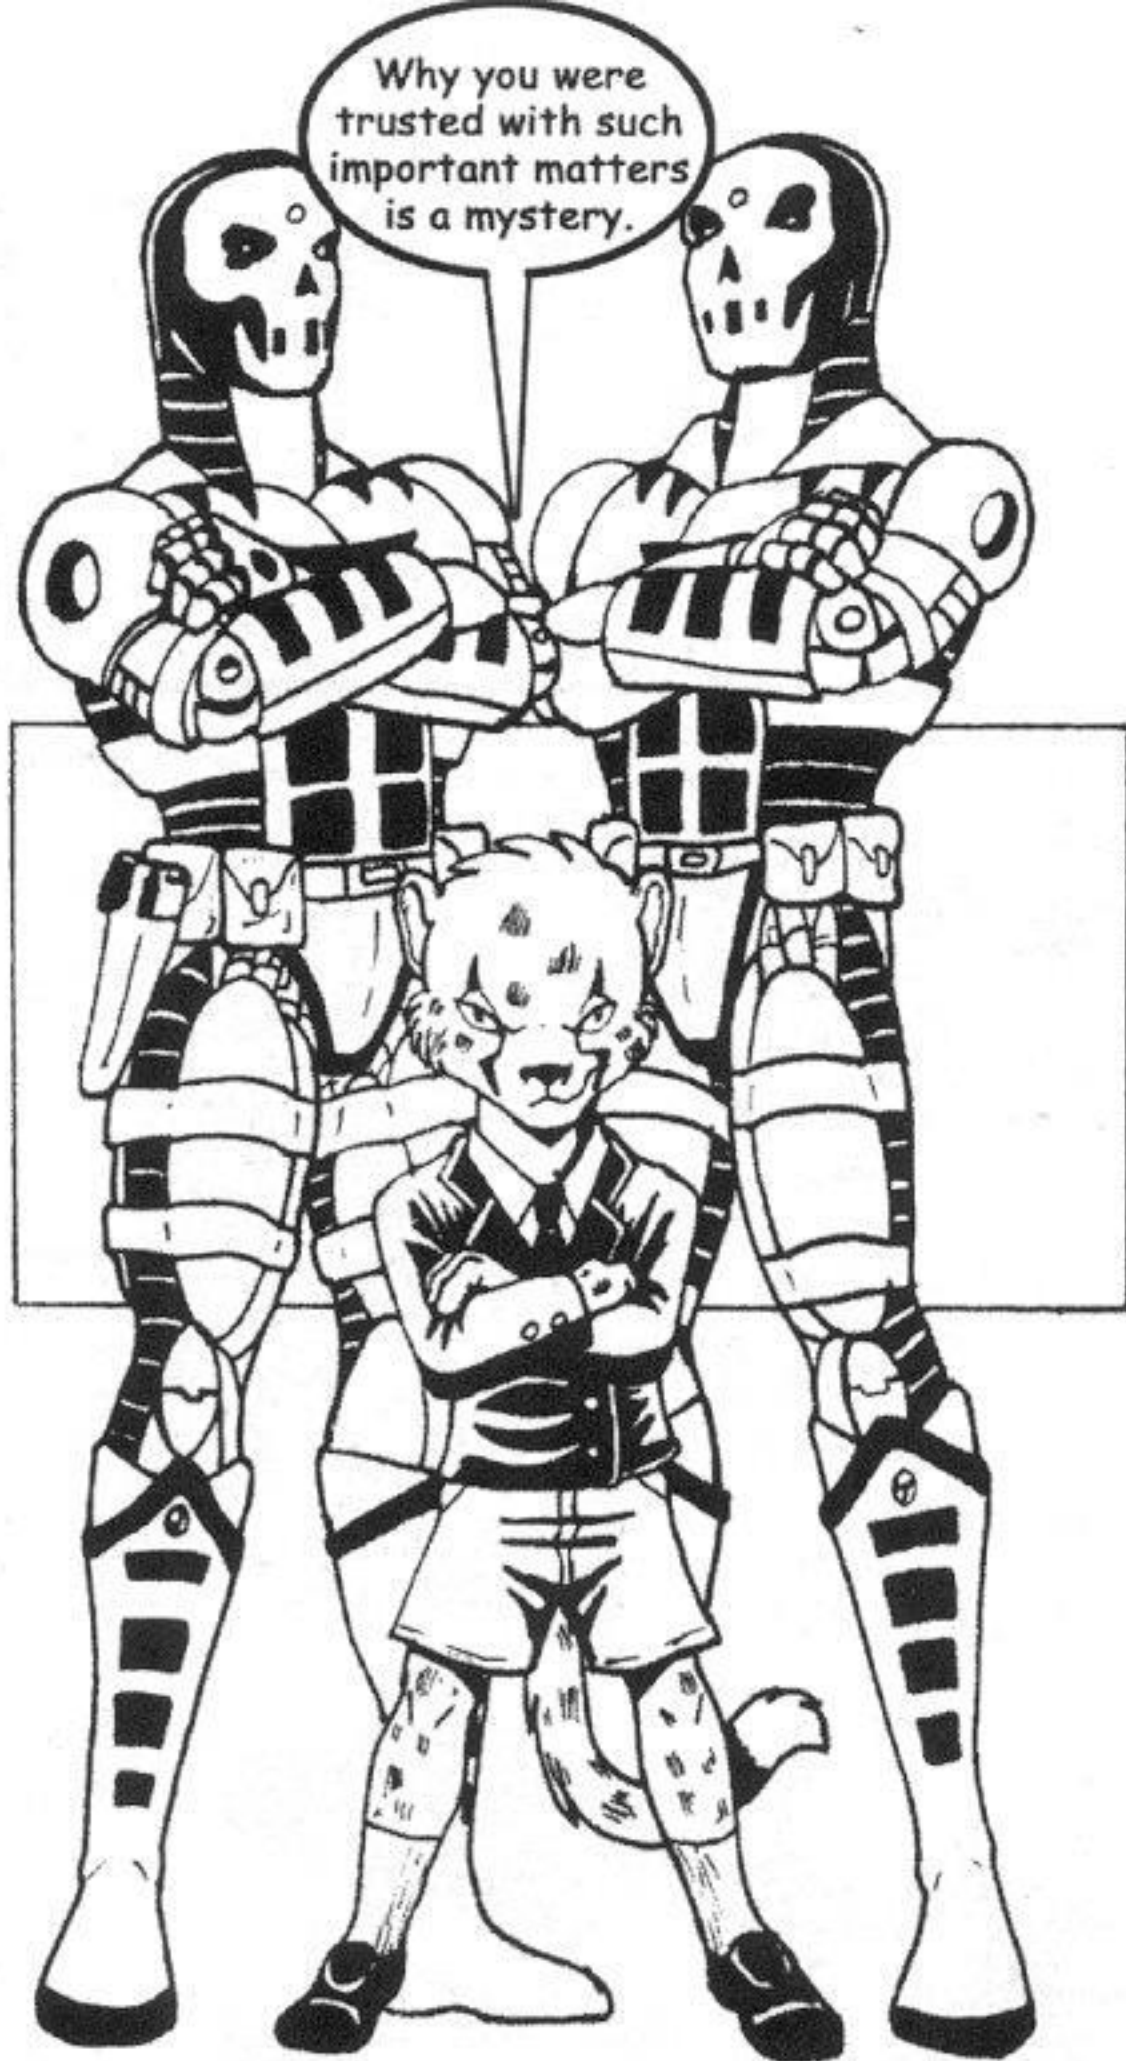

Pandora, you have
no sense of style
or fashion. I think
they're ravishing.

Well, I thought you were
so commanding.

See, Tonya
appreciates me.

Well. I thought it was
a pathetic display, Sister.

Oh, no.

Why you were trusted with such important matters is a mystery.

While you sit around acting all trumpy, I've been busy cleaning up your mistakes. Mother was really pleased with my findings.

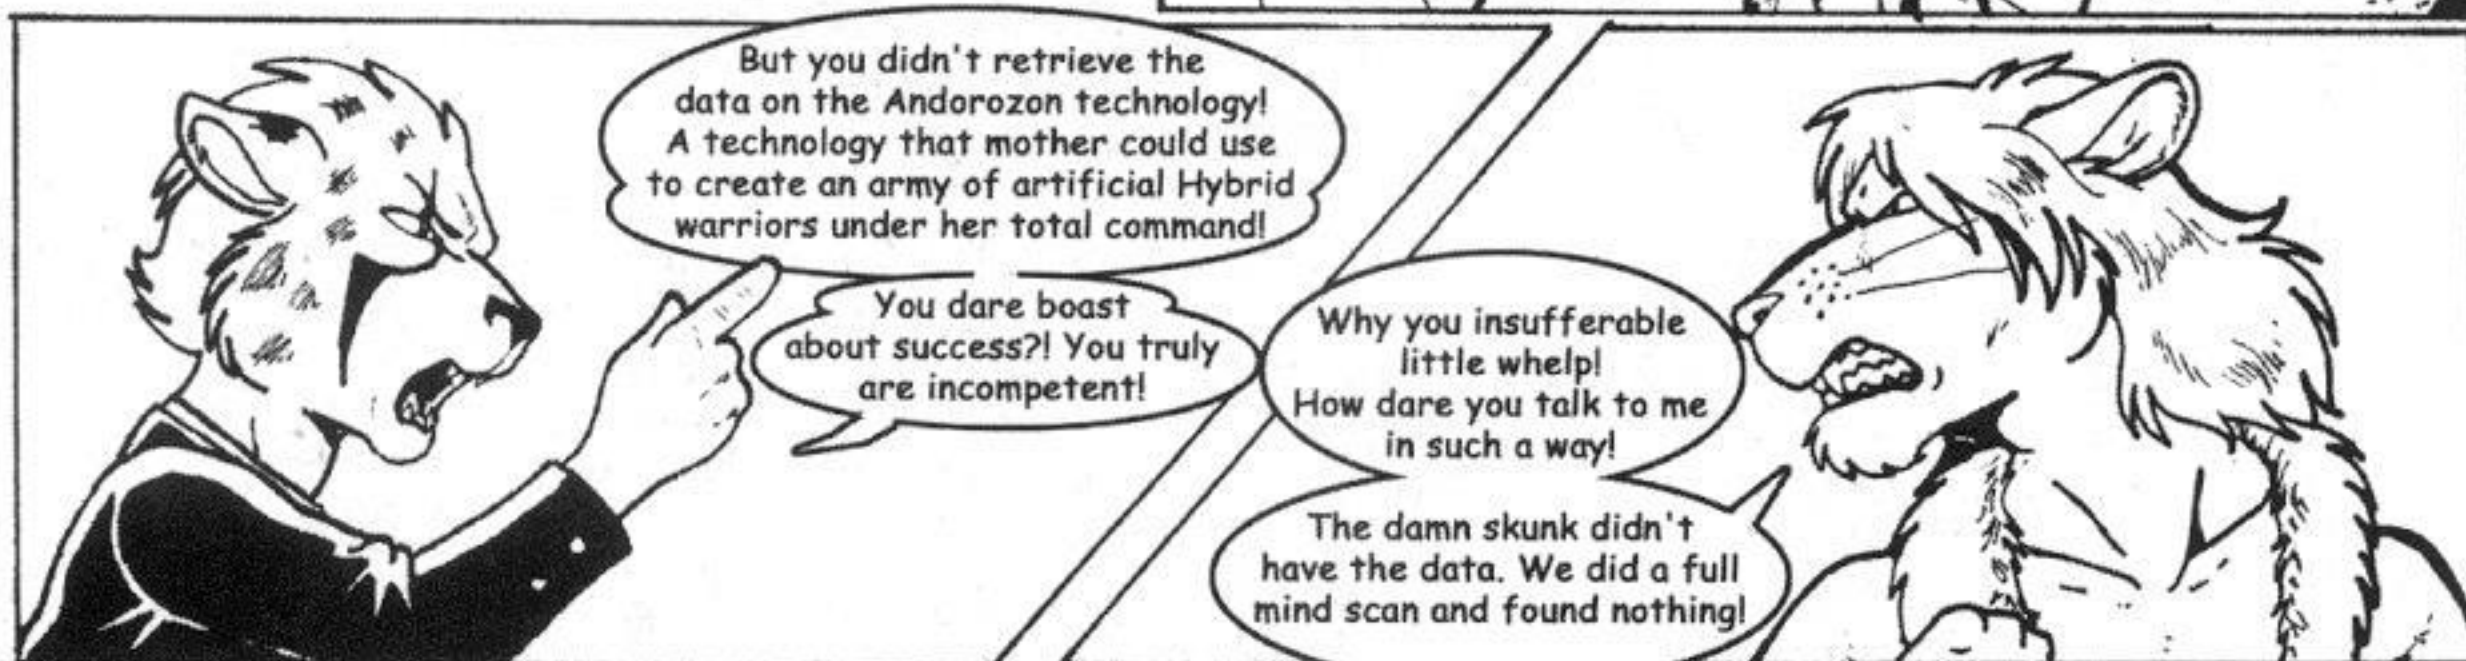

What are you yowling about, Chekari? (You little pest).

<Be nice to our little brother Zora.>

<Grrr. You're maternal instincts sometimes sickens me Tonya.>

We completed mother's orders to perfection. We've captured Dannoura and his Andorozons and have the leaders of Alden in our paws.

But you didn't retrieve the data on the Andorozon technology! A technology that mother could use to create an army of artificial Hybrid warriors under her total command!

You dare boast about success?! You truly are incompetent!

Why you insufferable little whelp! How dare you talk to me in such a way!

The damn skunk didn't have the data. We did a full mind scan and found nothing!

HA! That's where you are wrong. True, the professor didn't have any of the data in his memory, but he did know where it was. But I'll let mother tell you about that.

Oh Mother!

ZORA!

You disappoint me daughter. You know our mission on Alden is to secure a smooth transition of power for our coming forces.

It was discovered that Hybrids, with their special abilities could prove to be an important asset to our cause.

However, due to a revolt at our main facility we've lost all of the Hybrids in our charge and the data collected on them. Now we must turn to artificial means and the Andorozon technology is the key.

While you and your sisters are among my most perfect creations, it shames me to admit that I could not duplicate the Hybrid like abilities in you like the Andorozons have. With it under our control, however, we wouldn't have to capture Hybrids, but create an army of our very own.

You were right. The skunk, indeed, does not have the information we seek in his mind, nor are there any physical notes of his research. But the information was passed on to the unit known as Rokki.

I see that you have captured the Merry, Sue-chan, and Tsuneko units, but I see no record of the Rokki unit being captured. Where is she?

It was Pandora's job to capture them all!

She, uh, she was...knocked into the bay and...uh...drowned.

FOOLS! I want her body found! Even with her being nonfunctional the data can be extracted from her memory! Retrieve her immediately! Burden OUT!

ROAR!

This is all your fault! I told you I wanted all of them brought back alive and yet you let one drown!?

And why didn't I know about the information being in Rokki? How did she find this out and not me!

Because you over look the minor details.

It was right in front of you all along. The wolf heard the professor tell Rokki he stored the data in her memory. A simple mind probe gave up that knowledge.

Groan.

Well, a mind probe and a little fun.

Beta Hunters, new mission directives. Seek and retrieve the Andorozon unit called Rokki. Characteristics, flying squirrel. Let's show my sisters how to do things right.

Ladies and Gentlecreatures welcome to the Napaj International Airport. Please remain setted untile we've come to a complete stop and thank you for flying Avian Air.

Okay gang, here's what we're going to do. First we stop in to my office. I haven't been in for months.

Granted, it's not that unusual since I leave most of the business to my managers. Then we go looking for your friend Pandora.

I think one of the first places we should check is that Kakin Harbor. The squirrel girl I told you all about seemed to know this Dannoura guy. She was meeting someone.

I would also like to go to Sei Ryu Labs. That was the last reported sighting of Stinken.

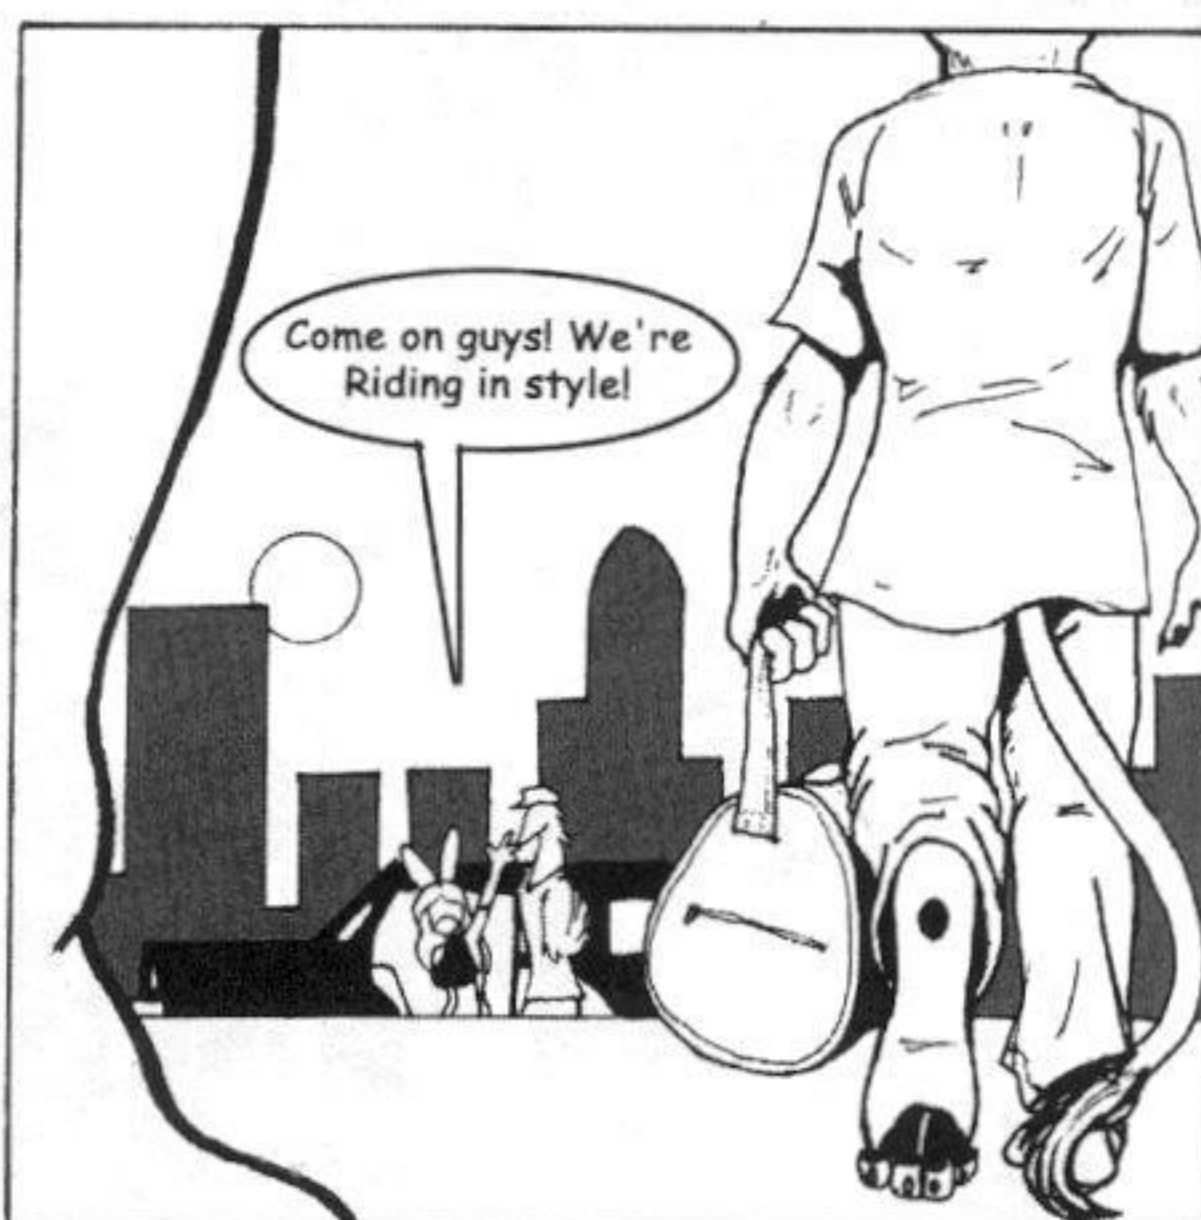

Especially the lab. I did some research It's the leading producers of biocybernetics. That kind of technology in the wrong hands could be dangerous.

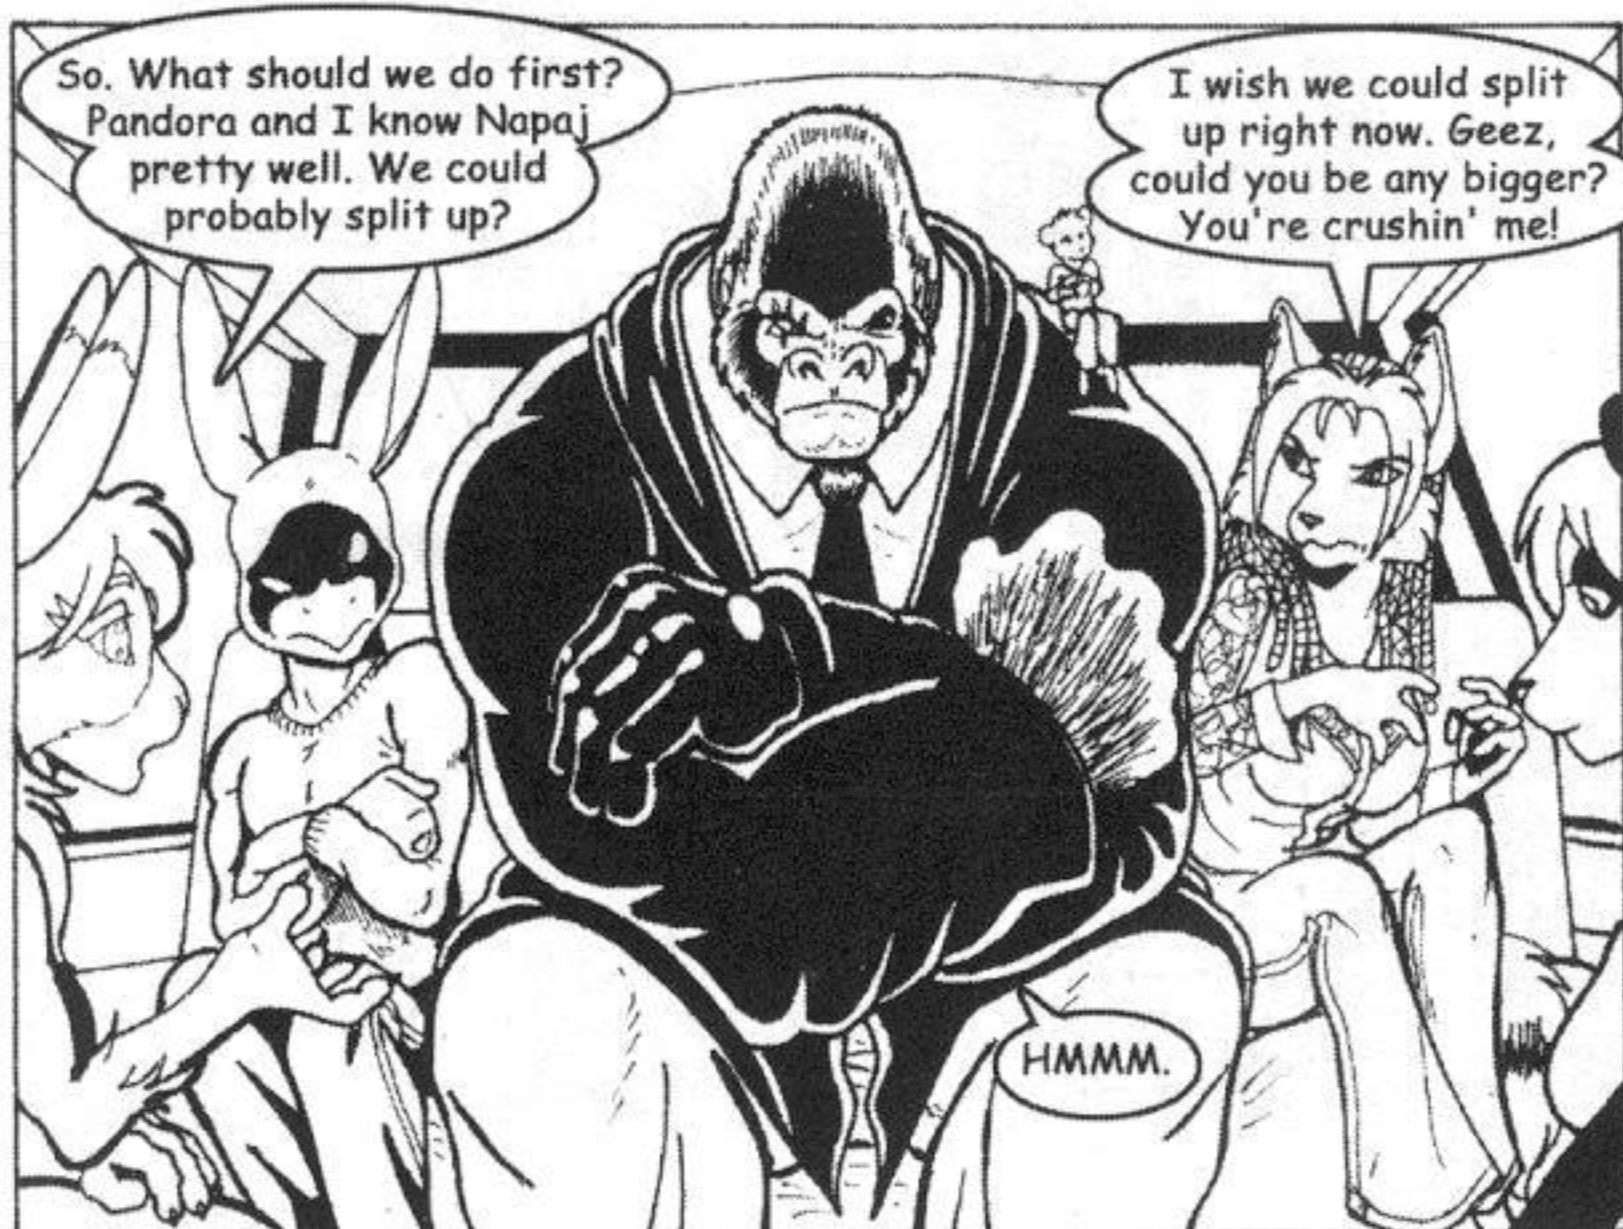

I hope the flight was a smooth one Ms. LaPlume?

Heh. Hey, I helped fly. What about me?

Why of course Wilber. You and your brother are the best!

Come on guys! We're Riding in style!

Sir. That's your sixth. I don't think...

That's right
You're not paid to think. Just protect.

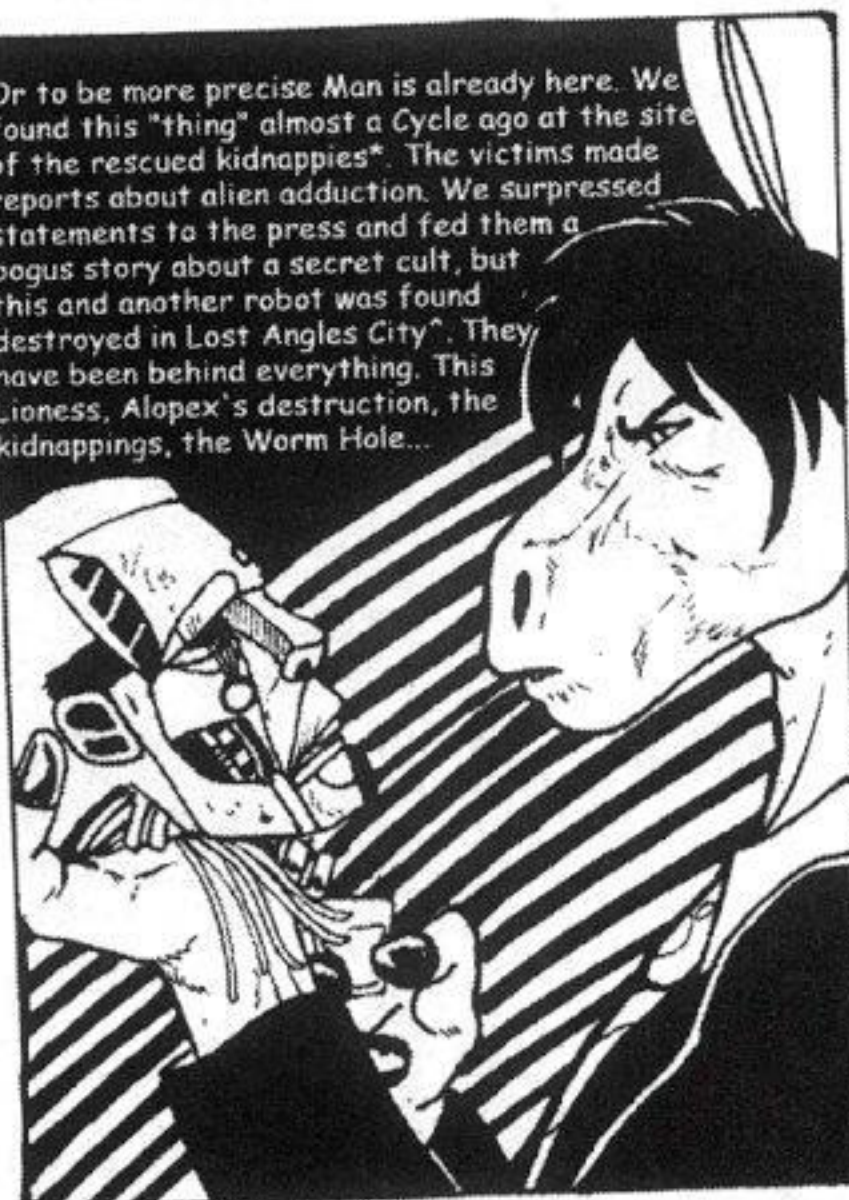

Well, lately none of you have been doing a Kenal of a good job at it. Do you see this? This thing here? No other nation knows that we have this in our possession, but before you is the greatest threat humanimal-kind has ever faced. We are under seigel!

That lioness is only the confirmation. The other Alden leaders just believe we're dealing with some common terrorist with dreams of world domination. But I know the truth.

Man is coming.

Or to be more precise Man is already here. We found this "thing" almost a Cycle ago at the site of the rescued kidnappies*. The victims made reports about alien abduction. We surpressed statements to the press and fed them a bogus story about a secret cult, but this and another robot was found destroyed in Lost Angles City*. They have been behind everything. This Lioness, Alopex's destruction, the kidnappings, the Worm Hole...

The taking of my daughter! ARRGH!

Sir?

Get out Randolph!
Get out!

"And one day Man will return to once again take stewardship of the earth. Until then, the creatures of the world, his beloved companions, will cultivate and groom the earth in his stead."

I was raised on those scriptures and many more about the possible return of the Makers, but this old donkey never thought he'd live to see it come true.

But have they come true? Could the Makers be so cruel as to take you away from us, my sweet Zelda? Your mother and I could not have children of our own, but when we adopted you our world was complete. But they took you. I will have you back.

No matter what the cost, I'll ensure nothing like this happens ever again.

!!! HIIIIURRLE? HELLO?

INITIALIZING VIDEO 50%...

Good news!
I made contact.

The squirrel?

Flying squirrel actually.
Her name's Rokki and
she says Dannoura was
kidnapped along with
some of her friends.

Kidnapped?
That's horrible!

Whoa. No doubt this
is the place. Looks like
a war went on here. What
are we getting ourselves
into here Pandora? Is your
friend a Hybrid or something?

Well, no. Not that
I remember. He's just
a doctor and he hates
violence.

Well somebody sure does.
Rokki said she'd meet use
here, so I guess we could
look to see if there are any
clues while we wait.

This is scout to base. Mistress,
three figures just arrived at
the docks. One flew in the other
two on her own. Over.

Maintain your position and continue
to survey. Backup will be there
ASAP. Out.

**ENOUGH! WE'RE ALL ON
THE SAME SIDE HERE!
LAY OFF ALREADY!**

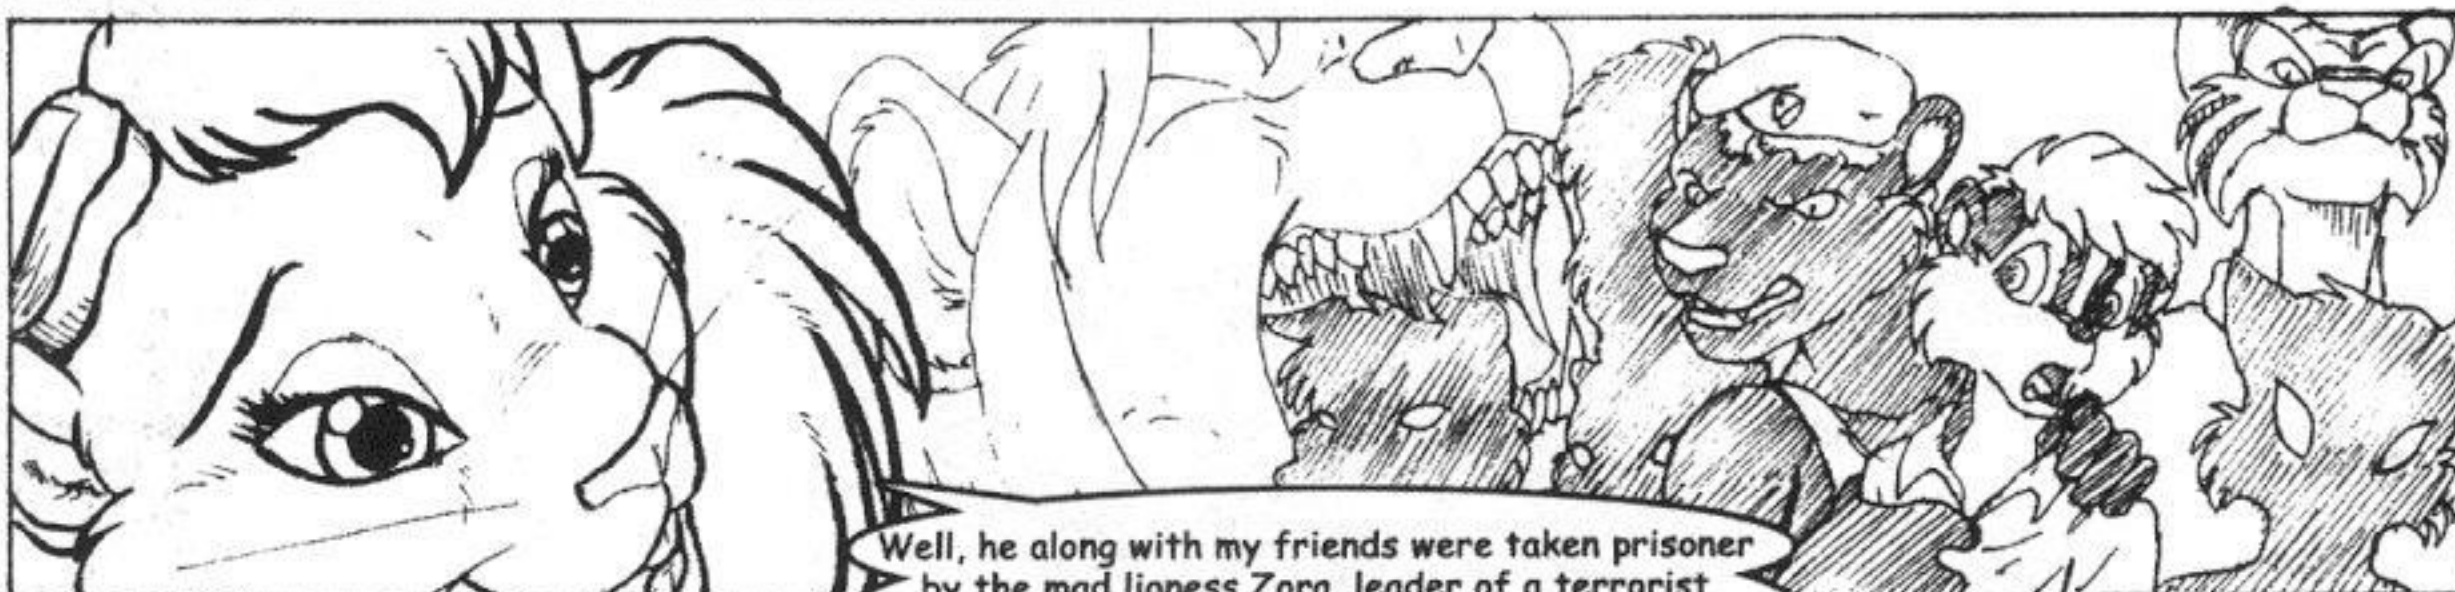

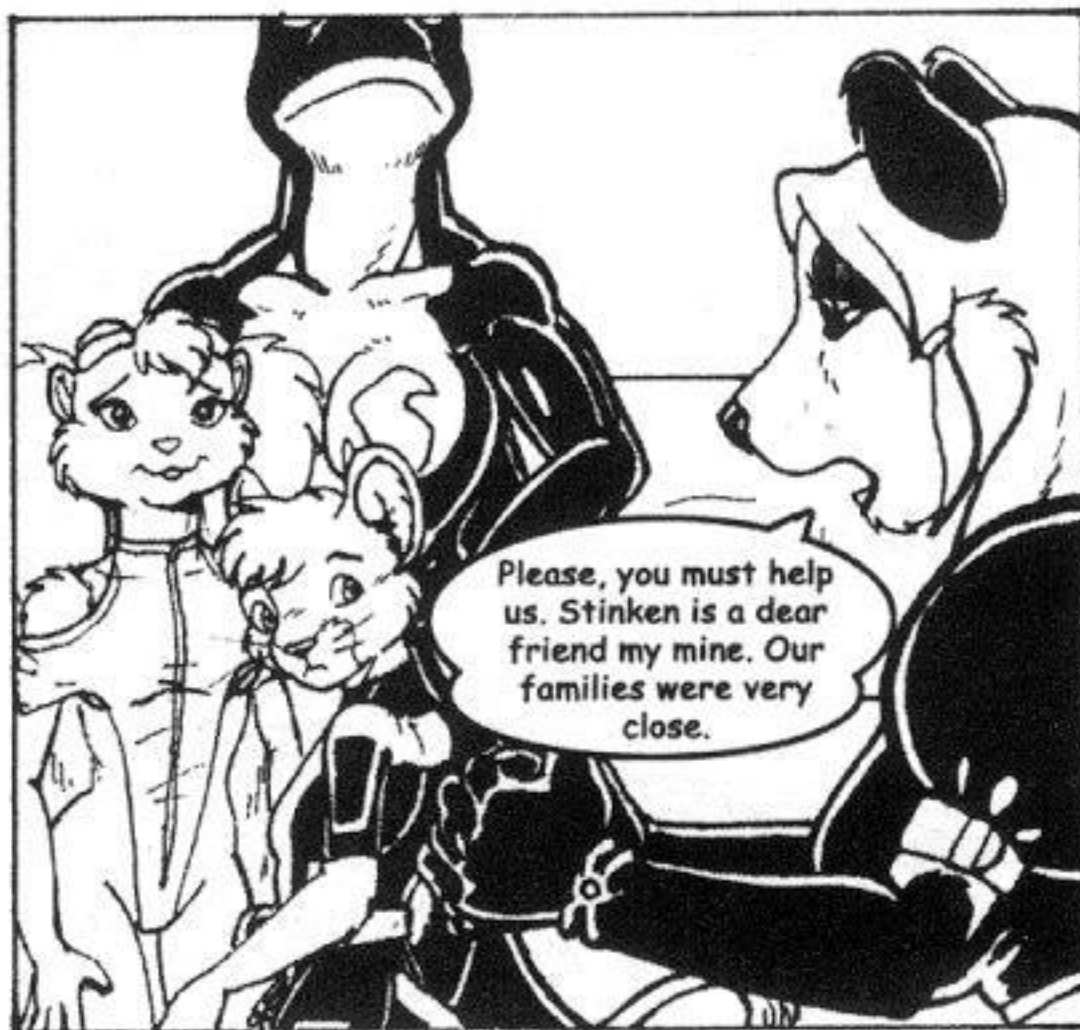

How did you do
that?

I'm a Hybrid.
My abilities allow
me to alter my size
big or small.

Look, we don't
want conflict.
We just want to
find the Dannoura
guy.

Please, you must help
us. Stinken is a dear
friend my mine. Our
families were very
close.

Well, he along with my friends were taken prisoner
by the mad lioness Zora, leader of a terrorist
group calling themselves the Evil Cat Sisters Inc.

We are not
Terrorist you
flying rat!

Fuzz. What now?

We are merely securing global control
for the arrival of our Mistress'
compatriots. The planet is theirs
after all.

So what if on occasion we
gotta break a couple of
stubborn eggs to get our
way?

Just like we're going to crack your skulls all over the docks. **KILL THEM**, but bring me the squirrel!

We Got Hostiles!

Sorry gals, but y'all braught this beatin' on yo'selves.

Keep them away from Rokkil! She may be our only hope of finding Stinken!

Easy for you to say!

Quick! Get behind me! Why do they want you?

I have the Andorozon data.

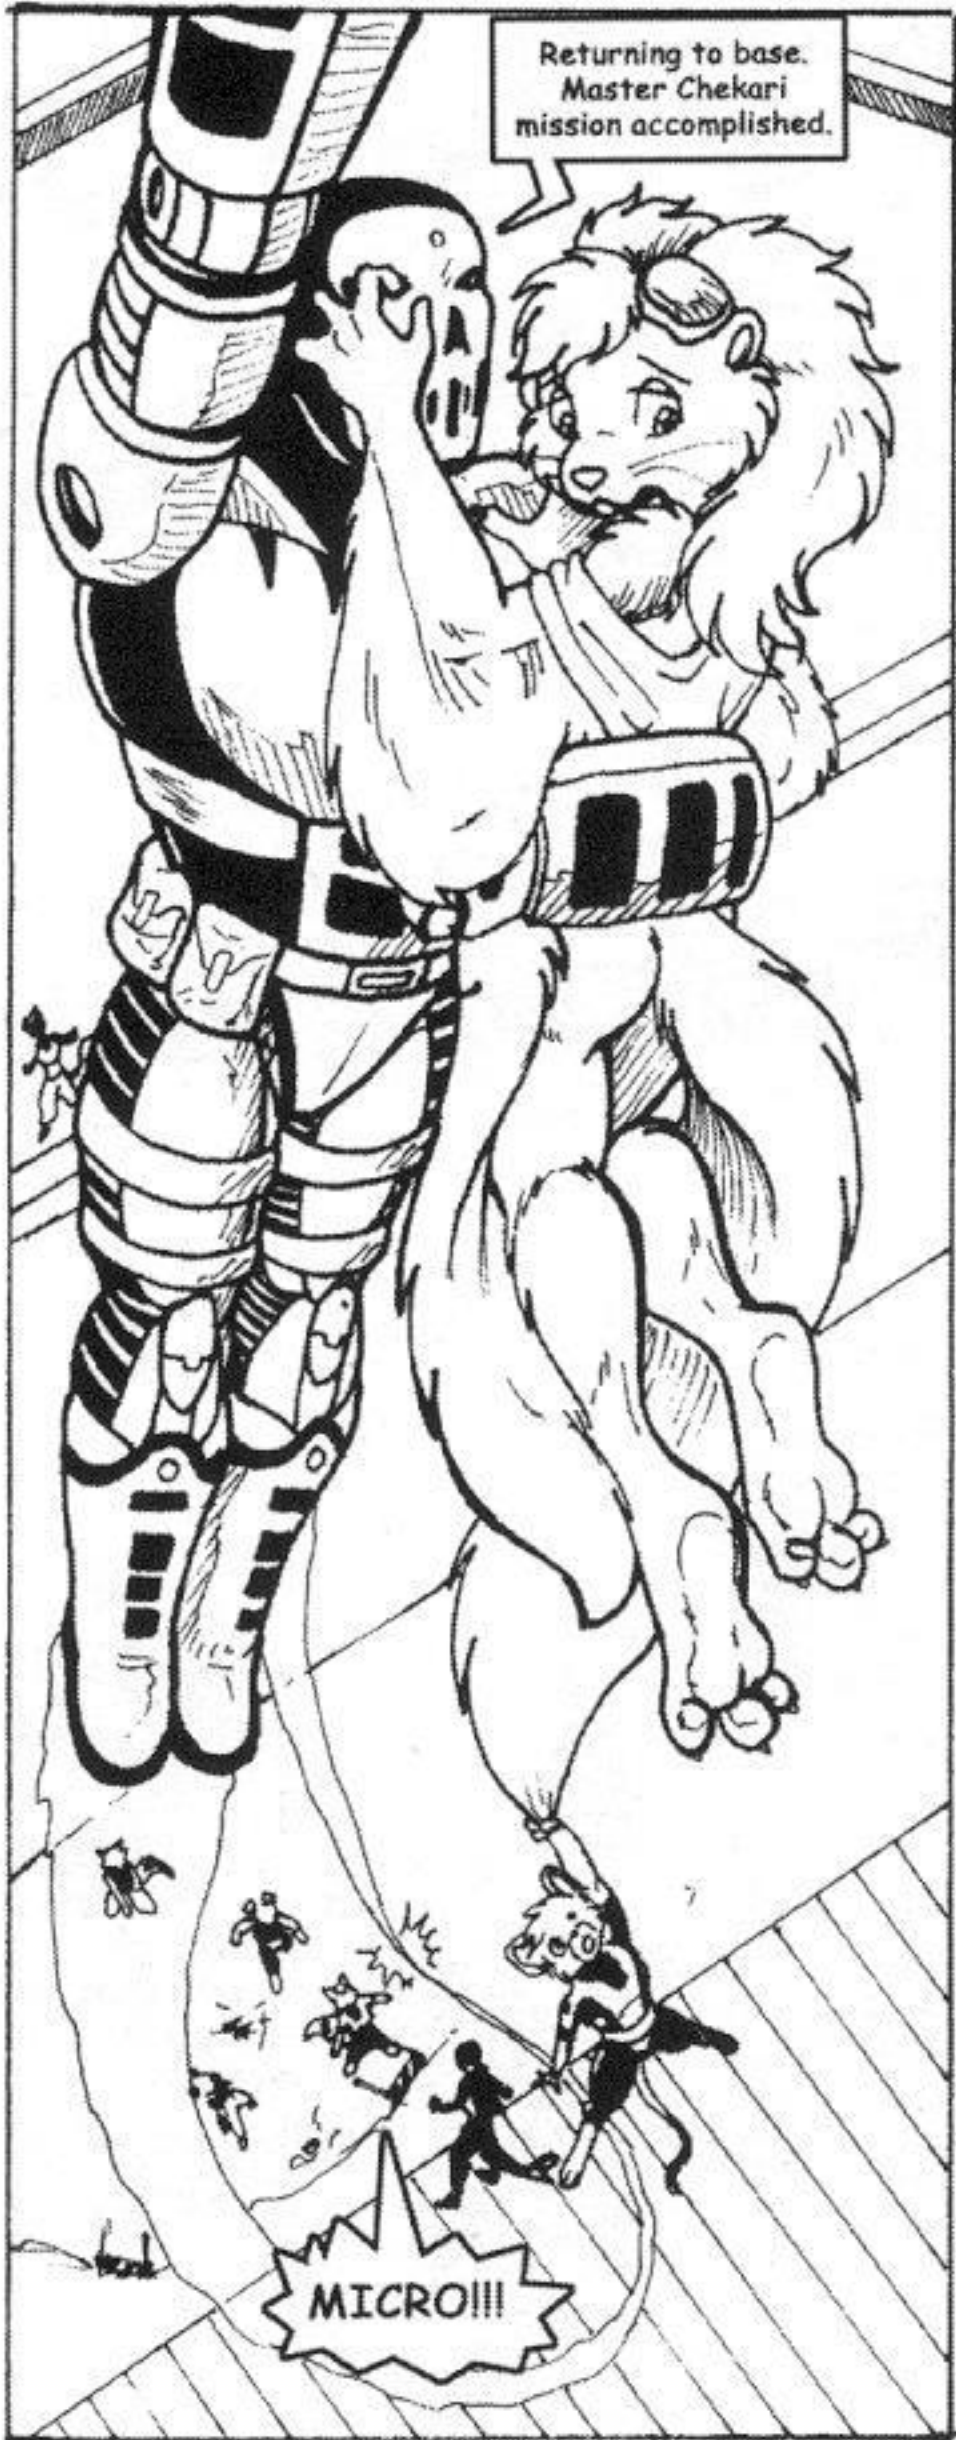

The what?

HA! HA! HA! That's it! We have them now!

Victory is..Huh? **NO!**

Just like you're about to be! Knockout gas?!?

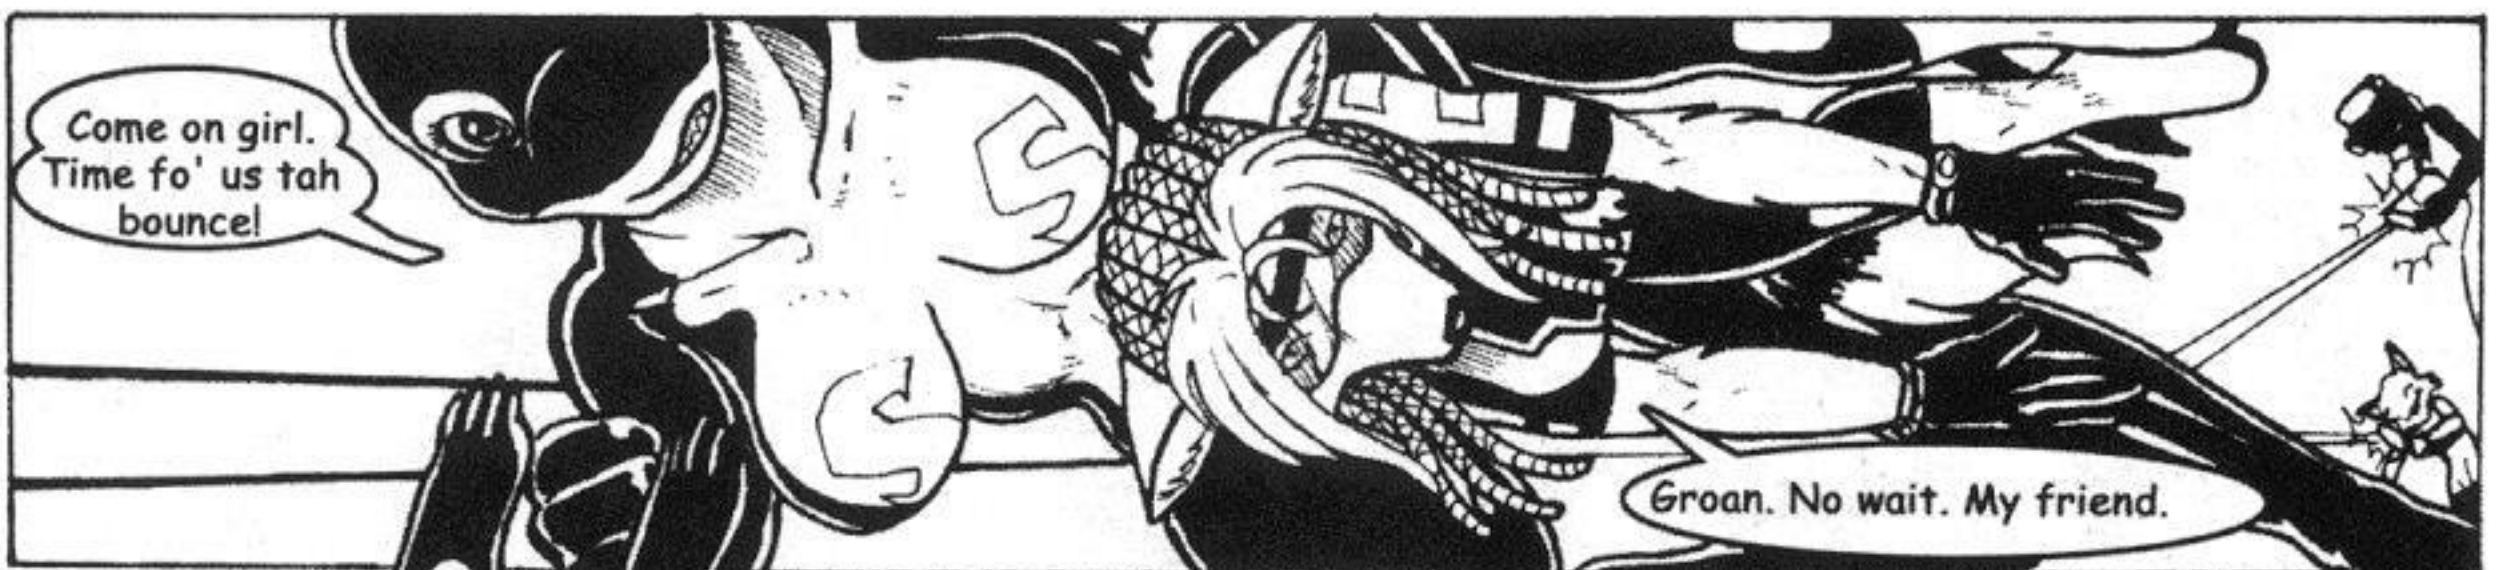

Ack! What? Sue Chan? What are you..

Back off Merry!

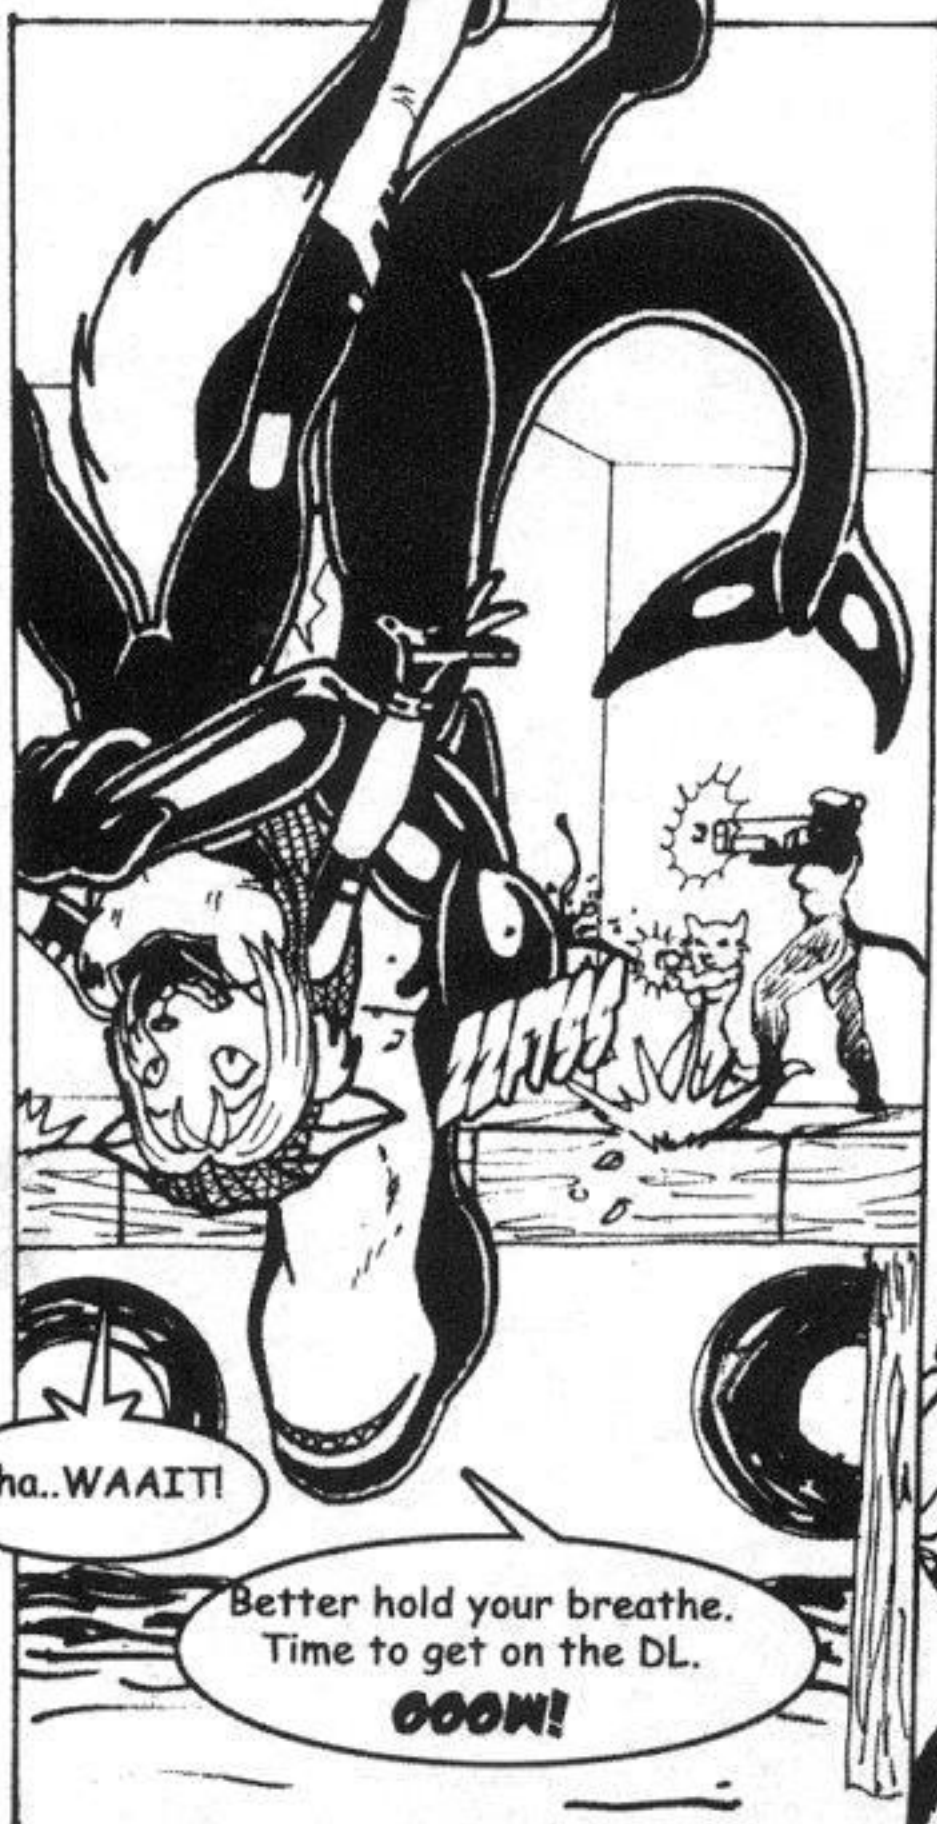

Yelp!

WHAP!

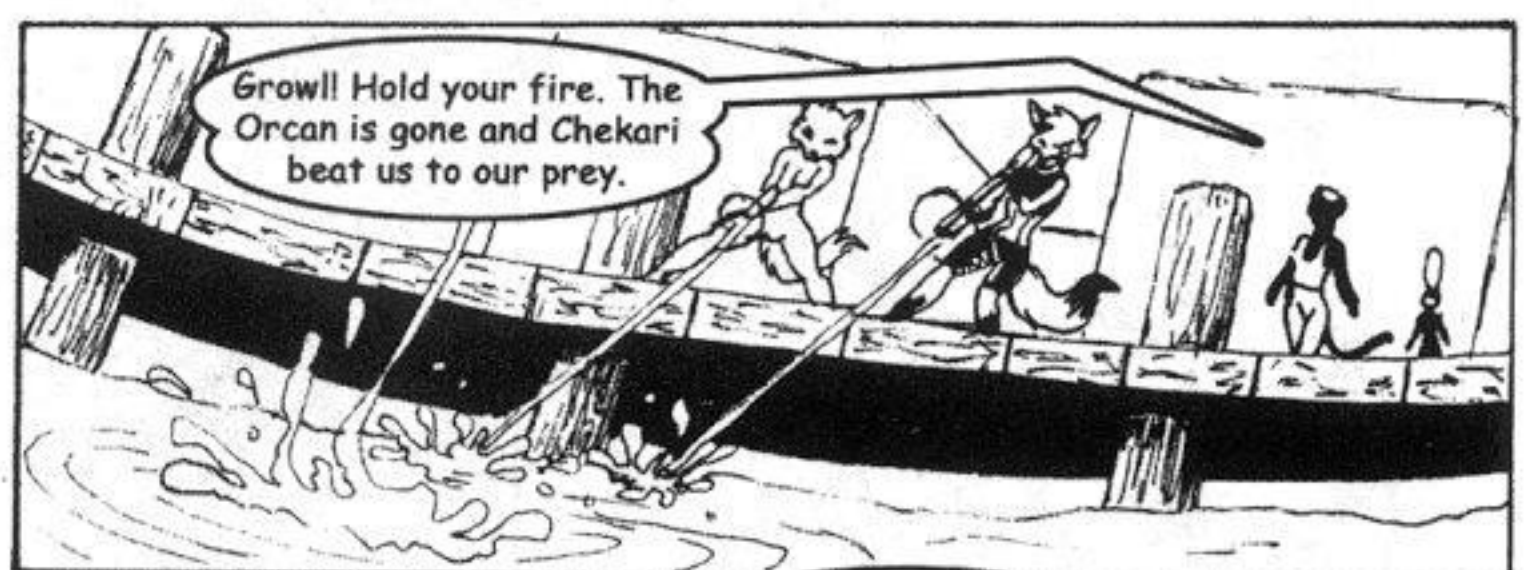

Come on girl. Time fo' us tah bounce!

Groan. No wait. My friend.

Wha..WAAIT!

Better hold your breathe. Time to get on the DL.
OOOW!

Growll Hold your fire. The Orcan is gone and Chekari beat us to our prey.

Grrr. We've failed. AGAIN! But we're not going back empty pawed.

This one knows something too and I'm scratching to find out what.

Downtown Yukoutoki Major-City,
Zui Province, Napaj: 8:34p.m.

We're here guys.

Sei Ryu Labs
courtesy Phenix express.
That must have been some
accident to have caused all
of this damage.

This was no accident.

Yes. The news reports say
it was an accident, but
someone wanted the
public to believe that.

.SNIFF. SNIFF.
These were Dannoura's
glasses.

There are signs of a
struggle.

Hey guys! There's
blood and fur over
here by the window.

Let me see that. Running
DNA analysis.

DNA matches the makeup
for a skunk. Has to be
Dannoura.

But, it's leading out
of the window. He
wouldn't survive a drop
like that.

Drop what ever you got in your paw and identify yourself! NOW! Shadowstalker!

On it. Do not resist red panda.

TALK!!

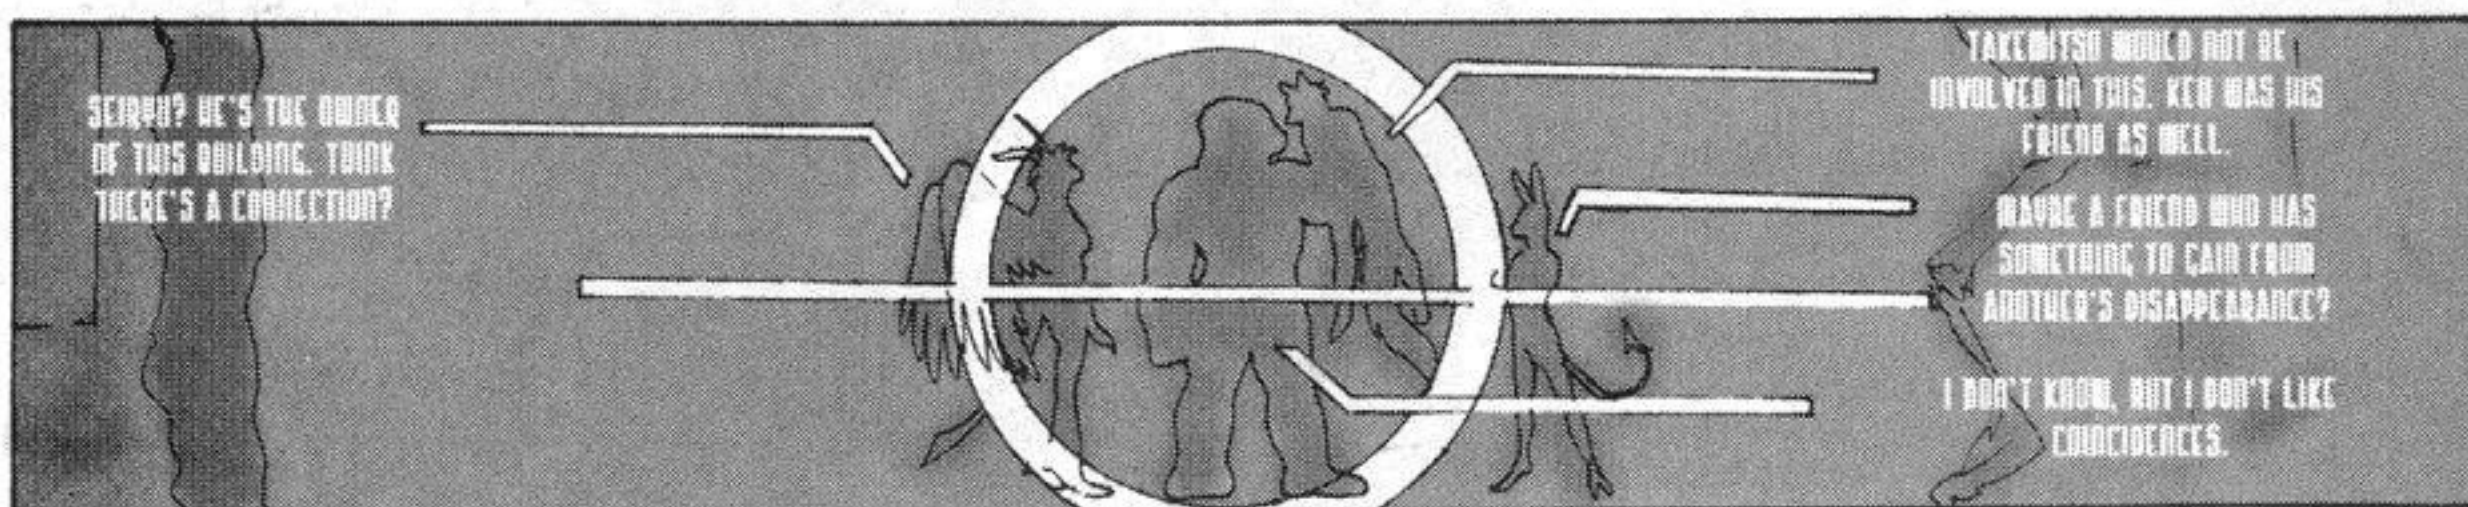

M..My name is Satoru Aka! I was just doing a favor for my friend Takemitsu SeiRyul!

What's your connection to Dannoura? The TRUTH, or so help me I'll crush you with my bare hand.

Ken was my cubhood friend! When I heard about the explosion, I came to see our mutual friend Takemitsu. I wanted to see if he was okay.

I was told that terrorist destroyed the lab and he asked me to fulfill a family debt and watch the lab for him in case they came back!

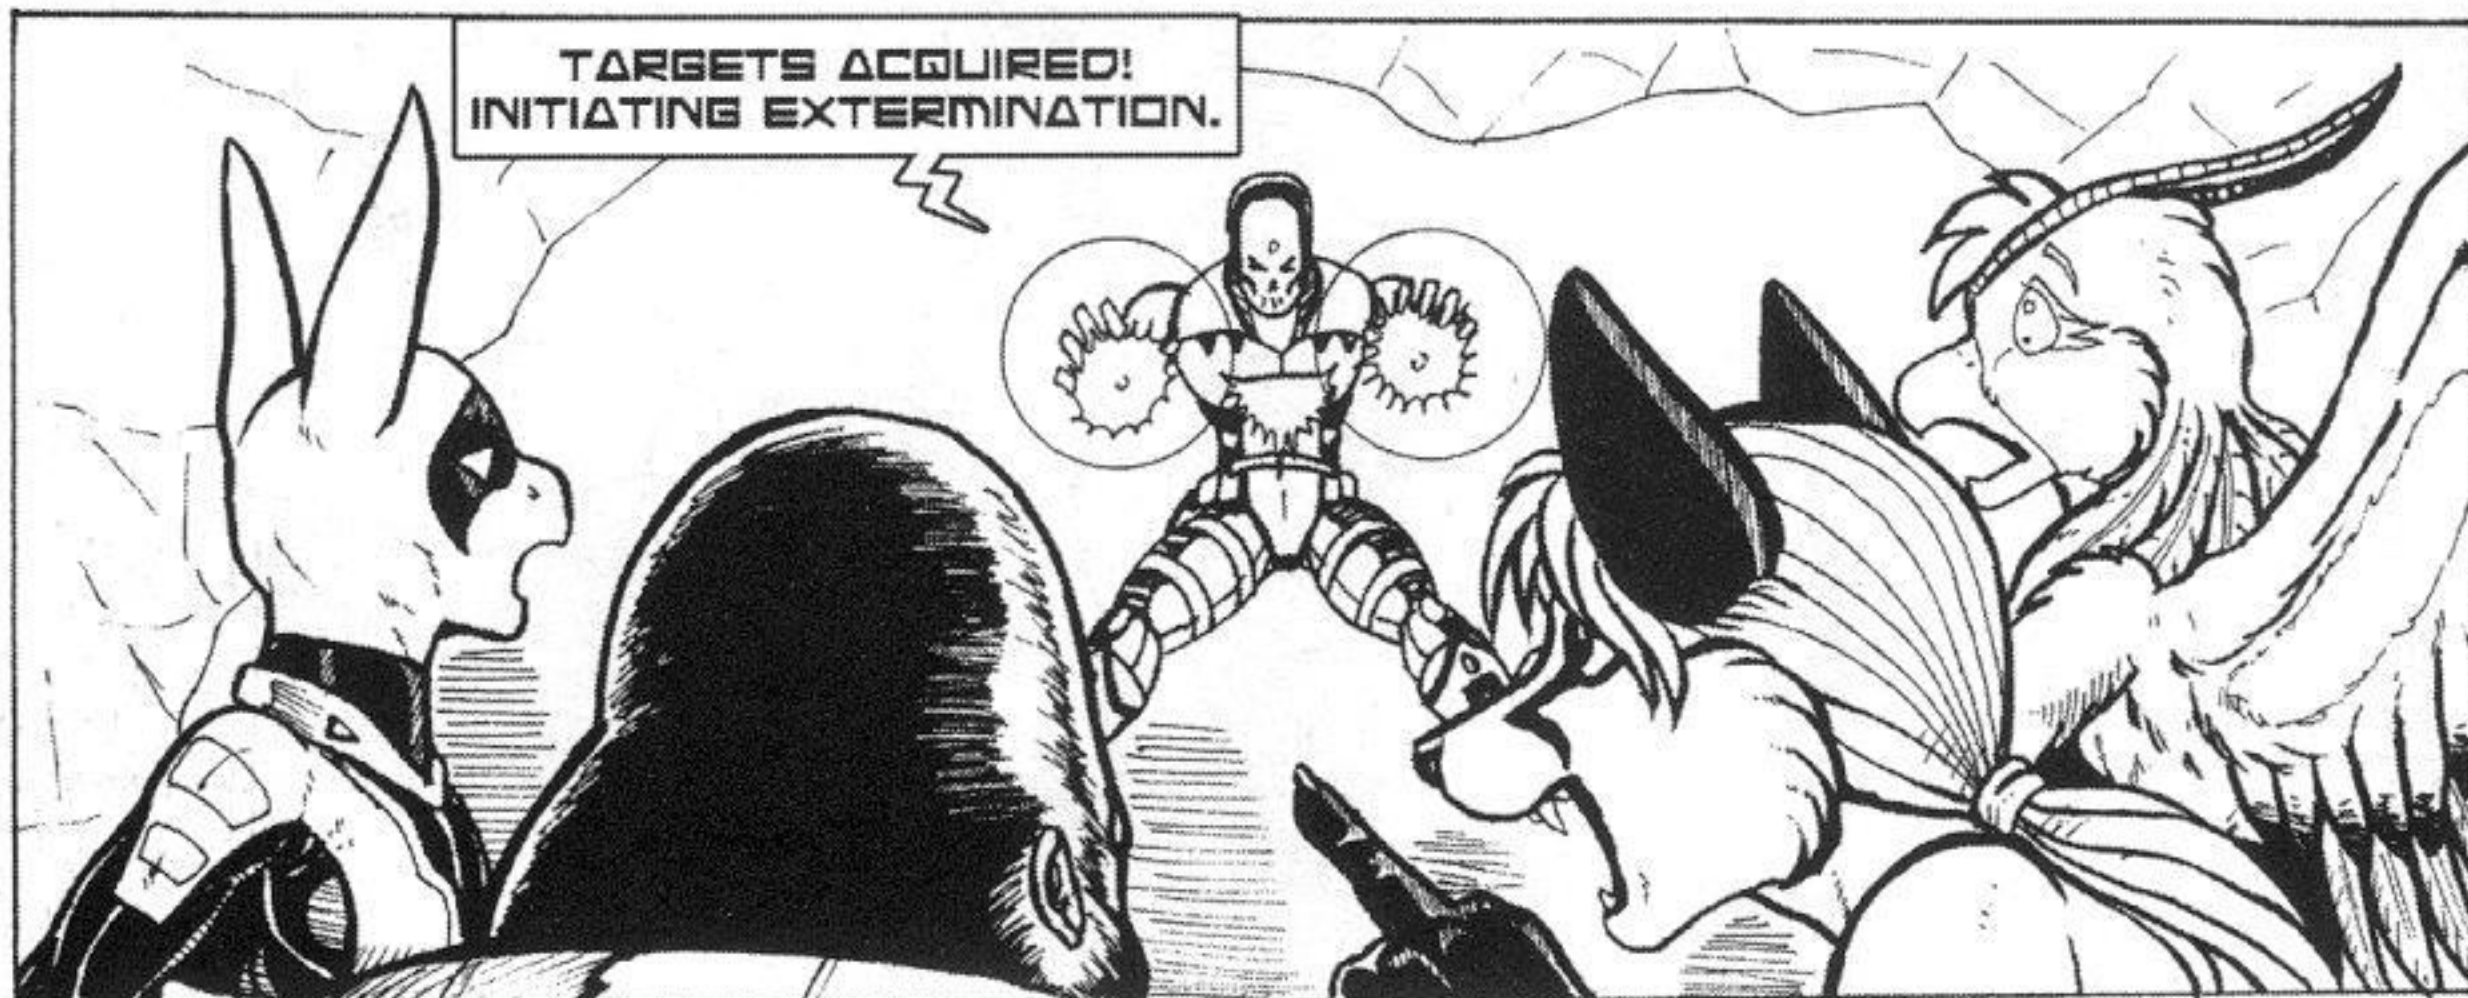

SEIRYU? HE'S THE OWNER OF THIS BUILDING. THINK THERE'S A CONNECTION?

TAKEMITSU WOULD NOT BE INVOLVED IN THIS. KEN WAS HIS FRIEND AS WELL.

MAYBE A FRIEND WHO HAS SOMETHING TO DO WITH ANOTHER'S DISAPPEARANCE?

I DON'T KNOW, BUT I DON'T LIKE COINCIDENCES.

TARGETS ACQUIRED! INITIATING EXTERMINATION.

They did
WHAT?!!?

It is true sir. The
whole building is
gone. Destroyed.

The first explosion was set up
to look like an attack to gain
the insurance for my father's
company. But this?

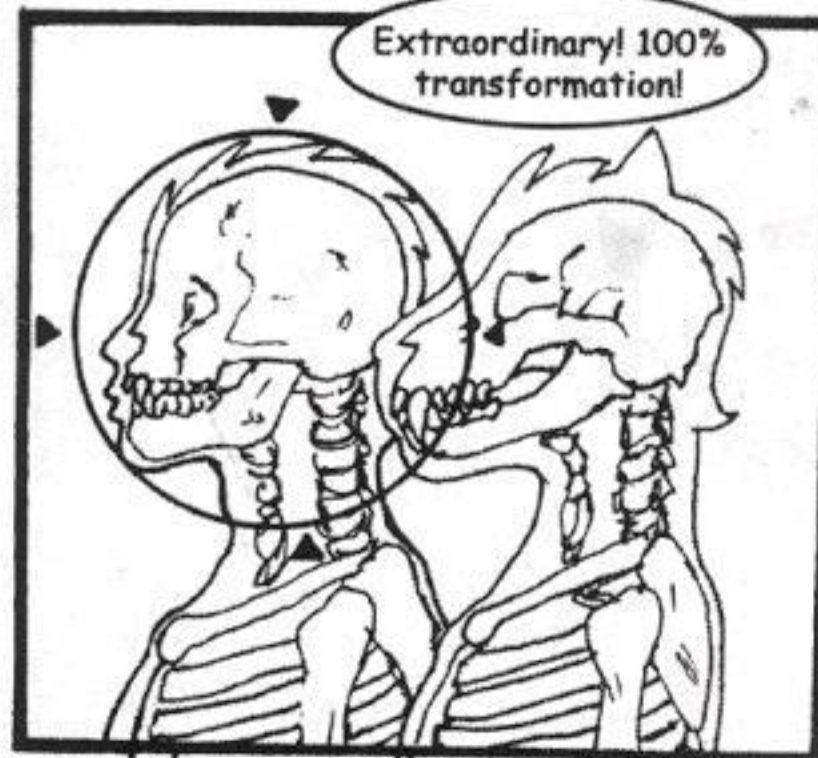

VAN BURDEN! I would have
words with you. The destruction
of my father's building was not..

Don't bother! me beast. I
have important experiments
to do.

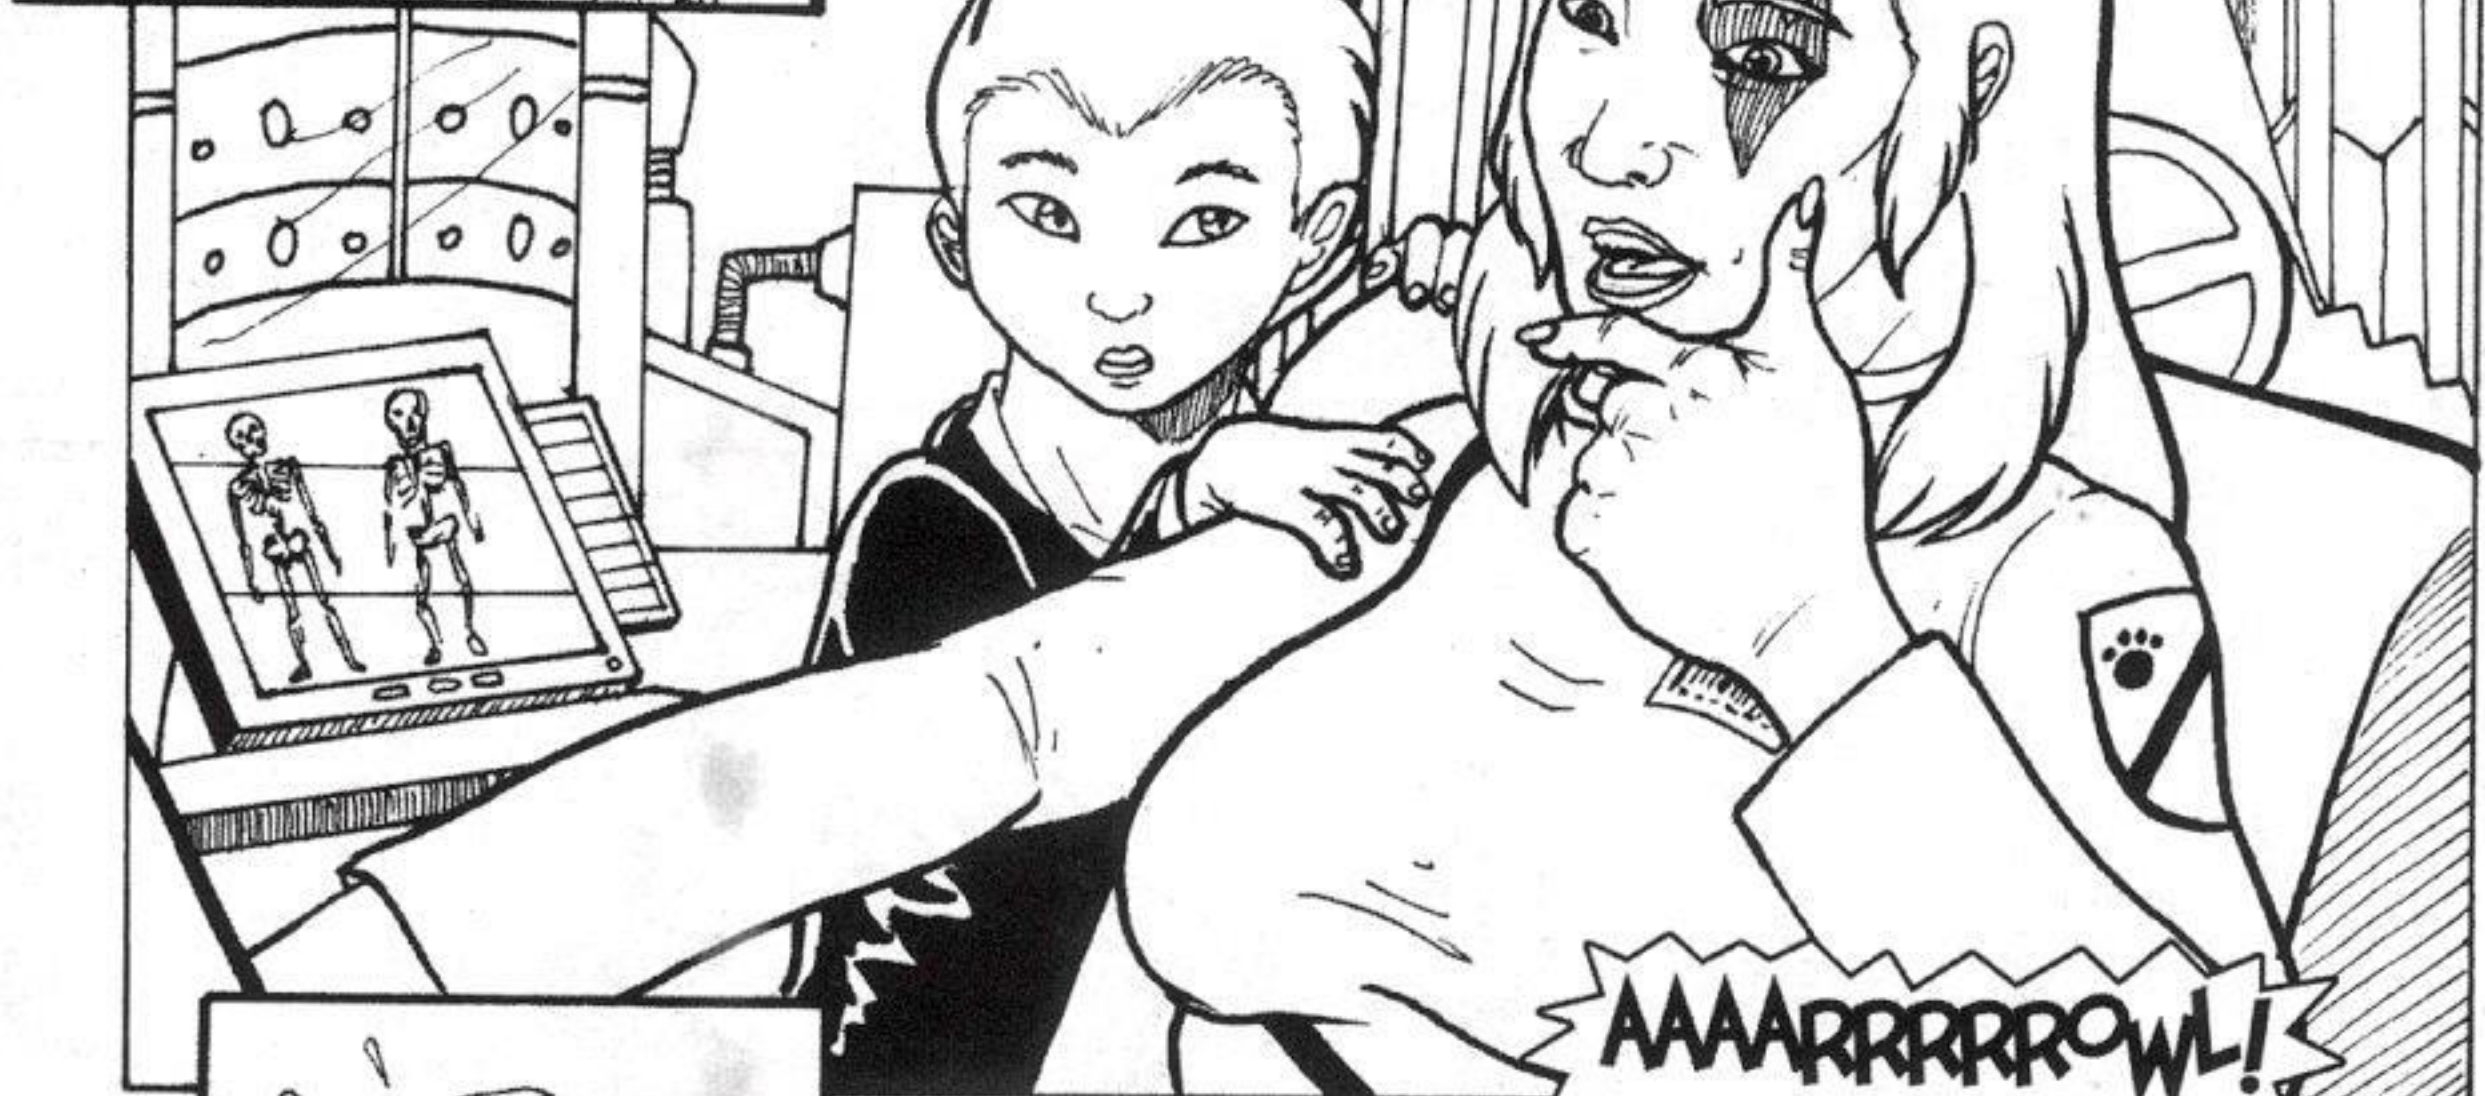

Why that furless..! She has ruined me!
Akera. Akema. We're going to pay
our partners a visit.

With the help of the genetic stabilizer machine you are able to maintain your human form for much longer. And your vitals are stronger in either form. These findings may allow me to move on to phase two of Operation Powershift without the Andorzon data.

I don't understand mother. Why wouldn't you still need the an...

Oh yes. Many years ago your mother was part of a research team called the Keepers. It was our job to watch over and guide the humanimals so that they could colonize this planet for mankind's arrival. But things did not go as planned and your mother and her companions were trapped in suspended animation for much longer than they were supposed to be. I was the first to awaken, and as I did so, I found that I could not wake up the others without killing them. Their poor bodies poisoned by damage to the life support chambers. So there I was, a young scientist alone for years on a planet full of intelligent animals, no immediate way of calling for assistance, and no way to awaken the remainder of my comrades. But now, I have a plan so simple I don't know why I didn't see it before and a means to complete my mission. All thanks to you and your sisters.

Meanwhile, back in Lost Angles.

He went where?
But, he promised
he'd take me with
him to see the
aliens!

Radica. I highly doubt they're
going to be running into any aliens
in Napaj. They just went to check
on a friend.

But he
PROMISED!

Radical Please, not now!
This is an important call
from my finishing
school!

No good, lyin',
cheese eatin', little
tick. When ah get
my paws on him.

Hello? Mr. Stagmyer? Yes. Yes,
this is Katherine Fela. Yes,
I'm fine. Oh, thank you sir.
So about my classes?
Really? I can still finish
to graduate? Is an
independent study at all
possible?

Hmm. This seems
to be the place.

I can! Yes! Oh thank
you sir. I'll be there
to pick up the material
first thing in the
morning. Bye!

Excuse me Ms. My name's
Angelica Ferrotti. My
agency sent me here by
request of a Ms. LaPlume.
Do you have a patient in
need of home care?

I'll say.
Come on in, I'll
take you to him.

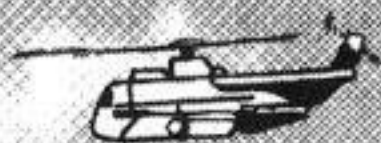

He's in a coma due to an 'accident'.
He was being very sweet and brave
trying to save my life when he was
accidently shot by a 'friend'. Since
then, I've hardly left his side.
I pray for the day he wakes up
again.

PUURRRRRRRRR.
